differentiated cosmetic ingredients.

Differentiated cosmetics with no chemical ingredients used mainly in existing cosmetics.

It is composed of ingredients that are harmless to the human body by extracting only natural ingredients as the main ingredient of the NK cell culture solution.

Your tired skin is clear and transparent...

It inhibits the expression of skin receptors MC1R (pigmentation by genes) and AHR (toxicity of chemicals and cancer cells).

It inhibits the expression of major enzymes in the production of melanin pigments (black or dark brown).

It inhibits the migration of melanosomes and the growth of the dendritic process of melanocytes.

Make your skin healthy and moisturized...

It strengthens the skin barrier weakened by ultraviolet rays and fine dust and recovers tired skin.

Increases skin's moisture content.

It quickly and surely releases the melanin pigment from the facial skin cells and restores it to the original facial skin

It creates a powerful cell membrane, which protects the skin from attacks by various chemicals.

Natural Material Beauty Clinic Launching

"To protect your skin, moisturize your skin and protect your cell membrane."

By maintaining the moisturizing effect of the skin, it increases the regenerative ability of skin cells, keeps the skin elastic, and prevents and treats wrinkles on the skin.

If the skin on the face is dry, it complements the moisture retention ability of the natural moisturizing factor (NMF) present in the stratum corneum and suppresses moisture evaporation, thereby always maintaining moist skin.

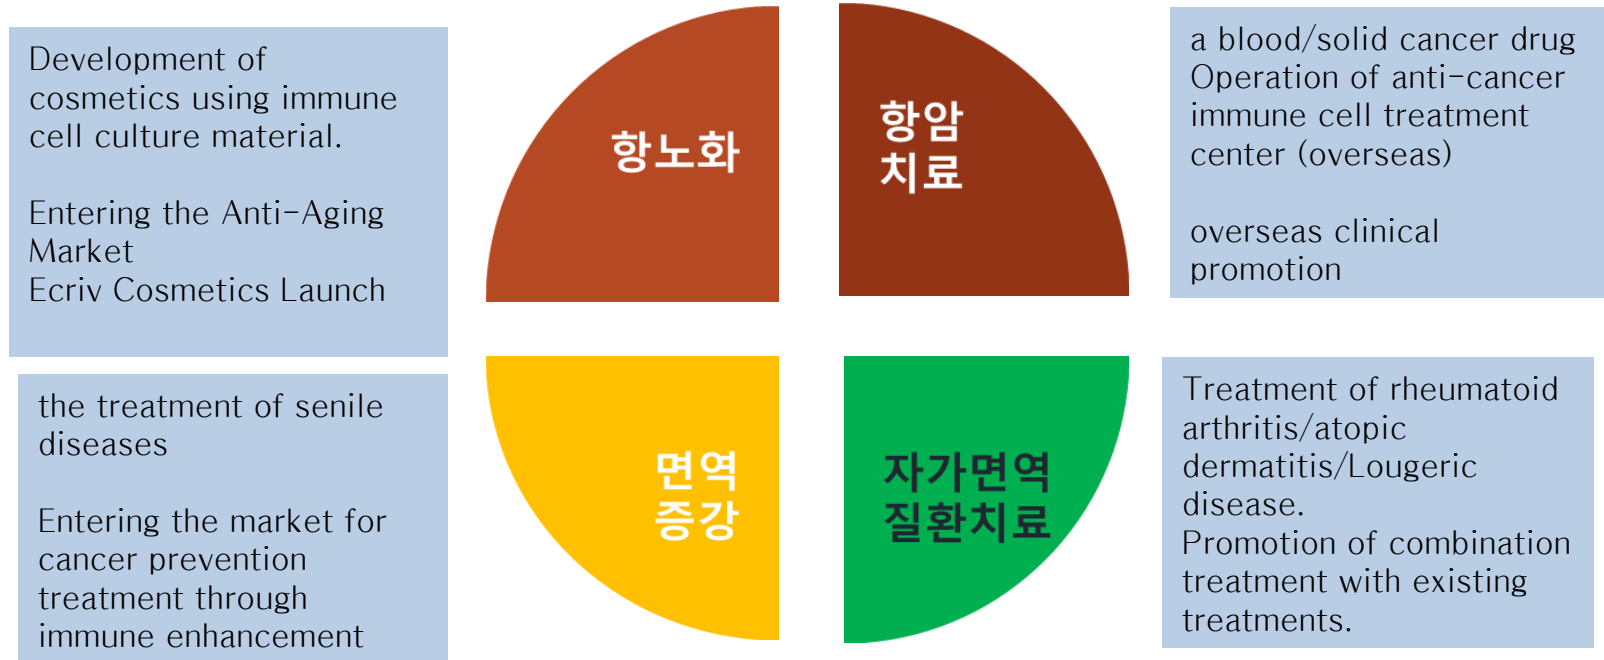

NK cosmetics / Zeni An cosmetics

NK-BIO is the world's first company to commercialize NK immune cell therapy based on NK immune cell technology.

In 2019, NK Corporation-affiliated Cosmetics Research Institute was established, and in June 2022, "Ecriv," a skin cell-improving cosmetics product, was launched.

This is the research result of NK-Bio.

What is NK immune cell culture fluid?

What is NK cell culture fluid?

Blood is collected from the human body, and immune cells NK, NKT, T, and DC are separated and cultured

The nutrient (food of NK cells) to increase cell activity (strong cells) and increase cell number (a large amount of cell volume) is called a culture solution, and a cosmetics product that is manufactured by selecting natural substances that restore and healthy skin cells from 2,000 kinds of culture solutions is "ecriv" cosmetics.
